

## **ADVIZOR® Goes Mobile and Into the Cloud.**

**Leading Data Discovery and Analysis Solutions now available on mobile devices and from managed collaborative environments.**

**CHICAGO, IL** – April 5, 2012. Data Discovery and Analysis Software leader [ADVIZOR Solutions®, Inc.](#) today announced the release of version 5.9 of its data discovery and business analysis software suite. Built on "speed of thought" in-memory data management, interactive data visualization, and predictive analytics, ADVIZOR empowers business people to better understand and analyze information without relying on others to prepare or interpret the results. ADVIZOR offers unique data analysis and interactive visualization capabilities which are easy to use and provide powerful results.

The 5.9 release includes two key new capabilities:

1. iPad tablet support
2. Cloud-based collaborative environment

As part of the movement to Agile Business Intelligence (Agile BI), ADVIZOR is committed to supporting mobile devices, and today is releasing **ADVIZOR for iPad**. ADVIZOR for iPad is an App Store application that connects with ADVIZOR Server to bring the full power of its interactive Visual Discovery™ to iPad users.

"The Agile BI movement involves access 'anywhere and anytime', and requires support of all client and web-based computing platforms. Tablet computers provide a great platform for visual reporting and analysis", says Doug Cogswell, President & CEO of ADVIZOR Solutions.

In addition, over the past year many organizations have made adopting cloud technologies for business intelligence a top priority. Cloud deployment can be a quick, cost effective, and secure means to deploy Visual Discovery to larger groups of people with minimal load on internal staff. To meet this demand, ADVIZOR Solutions is excited to announce **ADVIZOR Managed Hosting** -- a Software as a Service (SaaS) offering that provides both the technology infrastructure and software services needed to quickly make ADVIZOR visual data discovery projects accessible anywhere and anytime. The technical infrastructure leverages industry leading technology and is supported by ADVIZOR's proven expertise with in-memory-data-management. ADVIZOR Managed Hosting also fosters collaborative activities associated with the discovery and analysis process through built-in features such as discussions and document sharing.

ADVIZOR's products are designed for point-and-click ease of use and do not require specialized IT training. ADVIZOR can simultaneously tap into nearly all data sources from the desktop to the enterprise in order to create powerful interactive dashboards powered by its patented Visual Discovery™. For more information please view our 30 minute webinar, "[Agile BI Goes Mobile and Into the Cloud](#)".

**About [ADVIZOR Solutions®](#), Inc.**

ADVIZOR Data Discovery and Analysis Software enables people to make better and faster fact-based decisions from their business data. Built on patented visualization and in-memory-data-management software from Bell Labs and best-of-breed predictive analytics, ADVIZOR empowers business people to understand and analyze information without relying on others to prepare or interpret the results. ADVIZOR enables this through:

- Simple and clear visual display;
- Easy ad-hoc interaction and analysis with a mouse;
- Flexible thick and thin client deployments; and
- Tight integration with common databases and office tools

ADVIZOR is world-class in empowering people to display, analyze, and share their business information.
